I went through and identified sample surveys that are a little different from the norm, if you want to check these to test the program.

I also found another way they refer to self-reported complaints (WHY IS THIS A FREE TEXT FORM? If there were ever a reason to have a check box for consistency, you would think identifying the type of survey being conducted would be it. . . for crying out loud)

I'll add that and upload the notes to the Replit link

Two types in one:
